## VISITORS GUIDE

### WINTER 2025-2026

## **A mountain village resort that deals with its development.**

First resort in France to sign the national charter for the sustainable development of mountain resorts in 2007.

Only 15% of the ski area is equipped with snow cannons, only on the lower parts to ensure departure and return by skiing.

Maximum restriction on the use of staff vehicles: free shuttles, ski lockers.

The ski lifts and snow facilities artificial of the ski area are powered exclusively by electrical energy of renewable origin.

Working with farmers: planning work, grazing of the ski slopes, natural fertilization of the land.

## **A village resort concerned about its development.**

Since June 6, 2024, Arêches-Beaufort has obtained the green flake label with 2 flakes, which promotes local development with all the actors of the territory.

Our municipality is therefore developing a transition strategy towards a more resilient model at the economic, ecological, social and cultural levels with 3 main axes: mobility, housing and diversification.

This is a unique area, called "Snow attic" with an exceptional snow and 1300m vertical drop that you can do in one descent. Environment and the landscapes are values that we protect, to the delight of young and old!

100 hectares, 1300 m of elevation, nearly 50 km of slopes spread over 32 tracks, in a preserved nature.

The Arêches-Beaufort ski area has two linked sectors: the Grand-Mont and the Planay, which offer very different track profiles to share the needs and desires of all types of skiers.

Fun spaces reserved for beginners to discover skiing, while the skicross area "Bovoland" or the snowpark will allow you to progress and have fun. Various unmarked marked tracks will open the doors of freeride to discover this practice safely.
